

Kit Adrian Diocares

kitadrian.diocares@dorsu.edu.ph | kit-dev-delta.vercel.app | github.com/flklr-dev

Skills

Languages: Javascript, Typescript, Java, HTML, CSS, Python, SQL

Technologies: React, React Native, Expo, Tailwind CSS, Firebase, Github, Node.js

Experience

Freelance Web Developer, Fiverr, LinkedIn

December 2024 – Present

- Converted 2–3 client mockups into responsive React/Tailwind websites, implementing navigation, grid layouts, and contact forms.
- Deployed projects to Vercel with custom domains and basic CI via GitHub Actions.
- Managed version control in Git/GitHub: branched for features, filed issues, and merged pull requests for bug fixes.

Projects

fintech

github.com/flklr-dev/fintech

- Built a cross-platform React Native app for real-time budgeting and expense tracking
- Enabled personalized budgets, automatic expense categorization, and spending-trend visualizations for data-driven financial planning
- Developed a secure Node.js/Express/MongoDB backend with AES-256 encryption, OAuth2 SSO, and TLS 1.3 to protect user data

CodeMentor

github.com/flklr-dev/codementor

- Built a React Native/Expo mobile app with gamified learning (XP, badges, streak streaks)
- Enabled personalized dashboards, structured courses, progress tracking, and offline access
- Implemented a Node.js/Express/MongoDB backend with JWT authentication and RESTful APIs for user and content management

Pantrypals

github.com/flklr-dev/pantrypals

- Built a mobile app with React Native for discovering, sharing, and organizing recipes
- Enabled users to plan meals, create collections, and explore trending dishes
- Integrated social features to connect users within a food-focused community

Education

Davao Oriental State University – BS in Information Technology, Candidate for Latin Honor Dean's Lister (2023-2025)

Expected June 2026
